

Being able to send and receive faxes is very important for our business, as is our phone lines. We need these lines kept clean for business use. We have a problem with telemarketers constantly sending us faxes and bothering us while trying to conduct business. We have to treat each phone call as a customer or potential customer. Telemarketers do not, nor should they, have the right to compromise our business. If we are seeking a product or service we will contact them - at a time that fits our business.

Please do not allow telemarketers to get in the way of business. And, further, they should not be allowed to compromise individuals if they choose to not be contacted.
